Work Experience

Digital Corps, Ball State University

SOFTWARE ENGINEER

Ball State University

Sept 2023 - Present

- Created an interactive orientation map for incoming Ball State freshmen using JavaScript and Leaflet.js, enhancing their campus navigation experience.
- Worked in a team of creatives where my role was to design the database architecture, implement secure user authentication and vote validation, and integrate Firebase for real-time data synchronization in the Ball State Century Football Voting app.
- Collaborated with a team of developers to design and build the Ball State Marching Band website, where I developed a custom WordPress CMS and a plugin to integrate content via API endpoints utilizing Postman for API testing, enhancing platform dynamism and user experience. Additionally, I built responsive frontend pages using React to display API-driven content, ensuring seamless performance across mobile and desktop devices.

Basitech

SOFTWARE ENGINEER

July 2024 - Present

- Collaborated with a team of freelance developers to design and develop a School Management System, where I built student management pages and integrated them with backend APIs to dynamically consume and display data. My contributions ensured high productivity, improved system efficiency, and migrated their former React project from JavaScript to TypeScript for improved type safety and maintainability.

Headstarter

SOFTWARE ENGINEER

Jul 2024 – Sept 2024

Fellowship Program

- Built and deployed 5 AI projects in 5 weeks using React JS, Next.js, Firebase, Clerk, and Vercel, following agile methodologies with weekly sprints and incorporated CI/CD practices for iterative deployment.

Projects

PANTRY VISION

- Developed a pantry management app with AI features, enabling users to track food items, label them with expiration dates, and use AI to generate random recipes and view food item analysis.
- Integrated image upload functionality using Gemini image processing to easily add food item into the Firebase database.

NEY BANK

- Currently building a fintech app for managing savings, checking accounts, investment portfolios, and money transfers across banks, with integrated social media features.

WHEEL OF LIFE

- Collaborated with a team to design and develop *The Wheel of Life*, a self-care app aimed at empowering users to achieve balance across eight key life areas. Integrated Firebase to manage user data storage for the waitlist and implemented Firebase Authentication for secure user access on the main site. Contributed to creating a seamless user experience while supporting the app's mission to provide personalized, AI-driven tasks for a more fulfilling and balanced life.

MONSTER MEDIA EVOLUTION

- Created an interactive website for ENG104 to showcase the evolution of monster portrayals in media.
- This project involved extensive research and data visualization to effectively illustrate the changing depiction of monsters over time, resulting in a rewarding and insightful experience.

Education

BALL STATE UNIVERSITY

Computer Science, minor in Computer Technology, 4.0 GPA

Muncie IN

Aug 2023 – Dec 2026

Skills

HTML, CSS, Javascript, Database Architecture, React, Typescript, Adonis JS, AWS, WordPress CMS, PHP, Gemini API, Open AI API, Firebase, NextJS, Python, MySQL, SQLite, Problem-Solving, Docker Containers, Collaboration, Java, API Integration.

Extracurricular

- Ball State First Cooking Club | Vice-President: co-founded the club with a friend, leading initiatives and activities.
- Ball State Business Analytics Club | Secretary
- Ball State Cybersecurity Club
- Ball State Drone Club | Treasurer
